Design that responds to you

TABLET ARMS: Making learning easier.

Educational facilities require chairs with work surfaces for note-taking. SitOnIt Seating offers a variety of tablet arm options that offer smooth work surfaces suitable for use with laptops, tablets and plain old pencil and paper. The tablet arms flip up and provide adequate clearance for easy access. Additionally, a tablet arm allows students to comfortably rest their arms and elbows, permitting them to lean forward and better engage in classroom discussion.

SitOnIt Seating tablet arms are durable and built to withstand daily wear and tear, all while being backed by a comprehensive lifetime warranty. Tablets are offered in right and left orientation and meet all of the rigorous standards required by education: ADA, GREENGUARD and CAL 133.
