ABOUT THE PROJECT

Northern Montana Hospital Women's & Family Health Clinic serves a growing community with thoughtfully designed facilities for new parents. It's part of the Northern Montana Hospital system that has a long history of serving people in the region at all stages of life. When the time came to renovate the Women's & Family Health Clinic, the hospital needed solutions not just targeted toward healthcare, but a variety of different needs. Dealer Office Equipment Co. worked with Sales Representative Eaton Group to draw on the breadth of products from SitOnIt Seating and IDEON to find the answers.

WHAT MADE THE DIFFERENCE?

The clinic was needed a variety of seating – and tables – to complete the space. From exam rooms to waiting rooms and administrative offices, the whole facility was looking for seating solutions to complement the variety of new spaces.

Torsa and Wit were perfect for the administration areas. The comfort, versatility and price made them a great solution for the clinic. Focus Side worked as guest seating in administrative offices. IDEON's Aviera – in a variety of textiles – was perfect for exam room seating and the waiting areas, with design for easy patient access. The cleanout and field-replaceable parts make Aviera durable and easy to maintain for the clinic. And the Mezzanine tables for waiting areas rounded out the order – truly making SOI and IDEON a one-stop shop for the project.

WHAT'S NEXT

With this high-profile project completed, IDEON and SitOnIt Seating products are getting some great attention. Aviera is truly proving itself in the healthcare arena, and other winning products like Wit and Torsa mean customers can look to a single manufacturer for all their needs.
