**Product:** InFlex

### ABOUT THE PROJECT

San Diego's Del Lago Academy, Campus for Applied Science teaches students science, technology, engineering, art and math, giving them a unique edge when it's time to apply to college. The school focuses on teamwork – collaboration to encourage an open learning environment. The school opened its doors for a new school year in 2013 and welcomed 330 freshmen and sophomores to its modern, light-filled campus. The school found its perfect match for modern, light and sleek in SitOnIt Seating's InFlex

### WHAT MADE THE DIFFERENCE?

Catherine Rogers from OfficeMax had an existing relationship with the Purchasing Manager in the Escondido School District. Catherine brought in a variety of chairs and worked extensively with the school's Senior Designer and Purchasing Manager to identify a chair that would offer utility while capturing the look and feel of the school. When the InFlex was brought in, the school found its solution.

The school needed seating that was durable and resistant to cleaning chemicals. This is critical in any high-traffic, high-use space. But the school also liked the comfort and sturdiness of the chairs.

Buyers at the school also liked the many different looks and uses they could find in the InFlex collection. They liked that they had the option for an upholstered version for teachers.

In fact, the InFlex collection, with its stool option and variety of colors was used across the campus as office desk chairs, teacher's chairs and break room seating.

### WHAT'S NEXT

With the new Del Lago Academy making headlines in San Diego, the spotlight is sure to shine on InFlex and SitOnIt Seating. With the clean, modern look and a warranty that's perfectly suited to high-traffic education environments, Inflex is a great chair for schools.
