

SPECIFICATIONS

PATTERN:	Affinity
PRICE:	FG 3
LEAD TIME:	2-day
WARRANTY:	5 years
AVAILABILITY:	Approved for use on all seating models.

CHARACTERISTICS

Content:	100% vinyl
Finish:	i-clean™ and Antimicrobial
Backing:	100% polyester
Width:	54"
Pattern Repeat Size:	N/A
Weight Per Linear Yard:	40.19 oz
Cleaning Code:	WS / BC (1:5)
Country of Origin:	China

PERFORMANCE

Abrasion:	100,000 D.R.
Seam Slippage (Warp):	88 lbs
Tensile Strength (Warp):	137 lbs
Flammability:	CA TB117-2013 UFAC Class 1 NFPA 260 Class 1 MVSS 302
Colorfastness to Light Rating:	4
Lightfastness:	100 hours
Crocking, Dry:	Class 5
Piling Resistance:	Class 5
Note:	Multiple factors affect fabric durability and appearance retention, including end-user application and proper maintenance. Wyzenbeek results above 100,000 double rubs have not been shown to be an indicator of increased lifespan.

CARE + MAINTENANCE GUIDE

GENERAL MAINTENANCE RECOMMENDATIONS

- Clean and maintain your furniture regularly.
- A professional cleaning service is recommended.
- Do not saturate the furniture with liquids.
- Treat stains quickly. The stain will become increasingly more difficult to remove the longer it sits.
- Pretest any cleaning method or agent in an inconspicuous area of the furniture before using in a visible location.

STAIN AND DISINFECTANT RECOMMENDATIONS

Recommended Cleaning Solution: Mixture of Tide® or Oxiclean® and warm water (1 teaspoon of soap for every 16 ounces water)

For general spills, such as water, coffee, wine, etc.:

Gently blot with dry cloth to remove spill, if the spill has dried, dampen the cloth with water and gently work the spill in a circular motion. Avoid rubbing the infected area aggressively. Once the spill has been completely removed, it is important to wipe the surface with a dry cloth to remove any remaining moisture.

If the spill has evolved into a stain, a mixture of a mild soap, and water (See recommendation above) should be used to remove the stain. Dampen a cloth with the mixture and gently work the stain in a circular motion. Avoid rubbing the infected area aggressively, and be sure not to over saturate the fabric. After the stain is removed, dampen a cloth with water only and wipe away any excess soap left behind, and wipe the surface with a dry cloth to remove any remaining moisture.

For tougher, non-liquid spills, such as mustard, mayonnaise, sunscreen, etc.:

Remove the excess contaminant from the surface of the fabric before cleaning. If the spill has dried up on the fabric, a soft brush or butter knife should be used to remove the dried contaminants before any liquid cleaning treatment is performed. After the contaminants have been removed, proceed with the cleaning method above.

For Healthcare stains, such as Blood, Urine, Disinfectant, etc.:

A water to bleach solution of 5:1 is recommended. It is important to rinse the cleaned area with water, and dry after applying the bleach solution.

Note:

Residue left by cleaning agents will degrade and shorten the life and/or affect the product's appearance if not removed.

STAIN AND DISINFECTANT RECOMMENDATIONS CONTINUED

Using a solvent:

The use of solvents may be necessary when all other cleaning methods have been exhausted, and the stain remains. Spray the solvent directly onto the stain and allow it to sit for 2-3 minutes, avoid over saturating the fabric. Gently work the stain in a circular motion, and be sure to avoid rubbing the infected area aggressively. After cleaning, make sure to wipe the fabric down with a damp cloth to remove any excess cleaning solution, and then wipe down with a dry cloth to remove any remaining moisture.

i-clean™ FINISH EXPLAINED

Laguna has an i-clean™ finish. This finish utilizes nano-based technology that makes spills bead up and sit on the fabric until they are gently blotted with a cloth for clean-up. With their moisture repellency and stain resistance, fabrics with the i-clean finish make it easy to keep your furniture looking and feeling brand new.

ANTIMICROBIAL FINISH EXPLAINED

Element has an antimicrobial finish. This finish is a silver based ion technology that inhibits the growth of bacteria and other dangerous microbes. It also suppresses the growth of harmful mold, mildew and fungus.

This finish is registered with the United States Environmental Protection Agency (US EPA).

APPROVED CLEANERS

This list represents some of the most common options available and is not intended to be comprehensive.
