SitOnIt Extends Anytime Line

Cypress, CA (February 2006) – Due to popular demand, SitOnIt Seating has extended the Anytime line to include a new stool and task version. An upholstered option is also newly available.

A uniquely designed thermoplastic stacking chair, Anytime is a durable side chair, or can be utilized in group settings and public areas for improved efficiency and aesthetics. Anytime's tubular frame design comes standard with non-marring molded glides and is offered with a black or silver frame finish for a look that is versatile and always appropriate.

The new Anytime stool models are exceptionally comfortable and versatile and are available with or without arms in black or silver finish. Featuring a sleek and slender profile with a contoured seat and back, the Anytime stool is comfortably proportioned. A perforated polypropylene shell complements the design while providing ventilation and added comfort. Typical Anytime stool environments include corporate, commercial and institutional settings, including cafeterias, laboratories and libraries.

The new task chair incorporates the traditional Anytime perforated polypropylene seat and back shell. Ideal for use in computer labs and dormitories, the Anytime task chair is available with or without arms and with basic or swivel tilt mechanisms.

The contour of the new upholstered options conforms to the shape of the Anytime shell, maintaining ergonomic quality of the sitting space. Specify upholstery for the seat and back, or simply the seat alone with a polypropylene back. The upholstered pads add an extended degree of comfort, which makes them right for meeting, training and conference rooms where longer sitting is necessary.

Anytime ships just two to five business days from receipt of order. Find out how this seating will work for you, anytime, anywhere, by calling 888-274-8664.
