**Soft hand, sophisticated style. Durable, cleanable, hygienic and green.**

Designed for a wide range of upholstered seating.

PVC-Free Applications are not only beautiful textiles, they're designed to meet the tough performance standards of high-traffic commercial environments. Instead of Polyvinyl Chloride (PVC), these textiles feature polyurethane—resulting in a fabric that's soft, durable and easy to maintain. Perfect for creating a clean, contemporary and truly distinctive look every time. These textiles also feature anti-microbial and anti-bacterial properties for optimal infection control.

Radiate, Rebel and Foray are all manufactured with the Resilience<sup>SR</sup> protective finish—an invisible layer that offers the latest technology in Polyurethane and Vinyl protection. You'll enjoy heightened stain- and abrasion-resistance for additional surface durability, thereby increasing the life of the material.

Choose from Radiate, Canter, Rebel or Foray patterns and we'll do the rest.

**Being Green**

There's only one way to behave in this world. Responsibly.

At SitOnIt Seating, being green is by design, and we've added Greenguard and Greenguard for Children's + Schools Certification to our sustainability accomplishments. However, we're green and so much more...

By partnering with Momentum, we continue to be able to offer high performance textiles featuring fresh, contemporary color and pattern choices that are perfectly suited for any environment.

As we constantly improve and streamline our processes, we look for and take every opportunity to reduce, reuse and recycle.

# technical information

Width / Pattern	Content / Backing	Finish	Abrasion	Lightfastness	Repeats	Cleaning Code	Flammability	Grade
54" CANTER*	100% Polyurethane PVC Free / Polyester Knit Backing	Anti-microbial, Anti-bacterial	102,000	40 Hrs. Class 4.5	(none)	L	Cal 117-E, NFPA 260, UFAC Class 1	3
