OnCall: Innovation, Versatility, Affordability

Cypress, CA, December 2003 – Beginning in January 2004, OnCall, SitOnIt's hugely successful stacking chair first launched in December of 2002, is expanding to include tablet arm and bookrack options. The additions round out the line which includes arm and armless stacking models, a stool, a task chair and upholstered seat and back pad options.

OnCall is a versatile performer in business as well as educational, institutional, and health care settings. In addition to offering unique style and function, OnCall is competitively priced. List price for the basic armless model starts at \$110 and list price for models with arms starts at \$155.

The right-hand tablet arm features a black surface and flips up when not in use. The chrome bookrack sits low underneath the seat, increasing the amount of usable storage space for book backs, briefcases, backpacks, etc. OnCall is truly a value-added performer in training and educational environments.

Surprisingly light weight, OnCall features a convenient back handhold for ease of transport and storage. Using OnCall's stacking cart, the armless model stacks 25 high and the model with arms stacks 20 high, making for quick and easy storage. Even the stool model is designed to stack, just another example of SitOnIt's cutting edge product design.

OnCall's task model is available with and without arms and can be specified with both the Basic and Swivel Tilt controls. Ideal for business, educational and institutional environments, OnCall task expands the applications for which OnCall is ideal.

OnCall is designed for user comfort with a seat and back that provide a generous fit. These components are molded from high-impact polypropylene for long-lasting durability. For added comfort, users can upholster the seat and back – or just the seat – in one of SitOnIt's 270 designer textiles or a COM fabric.

A wall saver is incorporated into the frame design to minimize potential scuffs and marks on walls. Chairs can be ganged arm-to-arm or armless-to-armless, promoting maintained alignment and efficient space planning.

Offered with a lifetime warranty, OnCall is available when you need it, shipping in just two to five business days from receipt of order.
