

The power of more.

Contrast Stitching Selection Tool for Amplify Task Chairs

Place this sheet over a fabric sample to view how contrast stitching will appear on an Amplify upholstered seat.

Contrast stitching is available exclusively for Amplify task chairs – at no extra charge! Choose any SitOnIt Seating Collection solid-color carded fabric, including leather and vinyl. These threads can be mixed or matched with the six Amplify mesh back colors (desert, fire, fog, navy, nickel and onyx). Use the codes listed with each thread name for convenient ordering.

Note: This selection tool is a guide only. While the printed thread colors on this sheet match actual thread colors as closely as possible, interior lighting, textile type and fabric color may alter the appearance of the thread when stitched onto the upholstery.
