

LUMIN & RIO TABLETS

SitOnIt • Seating®

FEATURE SPOTLIGHT

Folding Tablet Arm

The folding tablet arm for Lumin and Rio multipurpose chairs is both stylish and efficient. Compact in size, the left or right tablet is made from durable plastic, an excellent choice for collaborative and training environments. The unique non-slip textured surface provides stability for mobile devices and includes a stylus slot.

Rio and Lumin tablet arm chairs are space savers. The efficient footprint allows more chairs in an area to maximize seating per square foot. The tablet folds down and out of the way when not in use. Chairs with tablet arms cannot be stacked.

Folding tablet arms are finished in black or fog to match the frame. The upcharge for either color is \$156 list.

• **Folding Tablet Arm, Left RMTL** • **Folding Tablet Arm, Right RMTR**

Best of all, this tablet can be specified with Lumin and Rio chairs on either glides or casters. When the tablet is combined with chairs on casters it allows greater flexibility in the classroom, bringing students closer to the instructor for knowledge sharing, gathering for group activities, or traditional learning.
