Shipping

Standard shipments are made via common carrier, unless otherwise specified. Special routing requests or circumstances generated by the customer or the consignee may result in additional charges.

Additional surcharges are referred to as accessorial charges and can arise due to various factors that extend beyond the typical point-to-point transportation.

Examples of such surcharges may include but are not limited to fuel surcharges, residential delivery fees, liftgate services, inside delivery charges and re-delivery fees. Carriers also impose detention fees if the loading process takes longer than the allocated free time they allow. This fee compensates for the carrier's time and resources spent waiting.

Storage fees could also occur under certain circumstances and typically come into play when the consignee is unable to receive the goods promptly upon arrival at the destination. This delay may be due to reasons such as availability, scheduling conflicts, or other issues on the recipient's end. These fees are intended to cover the costs associated with keeping the items in storage, including warehouse space, security, and handling.

Each of these surcharges will vary depending on the carrier that is transporting the order. Please contact Customer Experience to ascertain exactly what these charges are or would be in any of the above circumstances.

Standard deliveries are dock to dock and are scheduled to occur Monday through Friday between 8 a.m. and 5 p.m.

If the delivery location has restricted delivery hours and canno't accept deliveries during normal business hours, Monday through Friday, 8 a.m. and to 5 p.m., this would require a smart delivery quote from Customer Experience. We will not be held responsible for issues or costs arising from carrier transit delays, missed delivery appointments, etc.

We reserve the right to charge for nonstandard customer delivery requirements that may include but are not limited to Residential, Lift Gate, Inside Delivery, Re-Delivery, Detention Fees (if the unloading process exceeds the standard allotted free time) and Storage.

ORDERING INFORMATION

Freight Terms

Freight terms apply to the continental U.S. only. This excludes Alaska and Hawaii. All standard transportation services and freight costs are included in the price of our products. We ship freight prepaid and allowed, FOB and origin.

Shipments outside the contiguous U.S. are shipped to the point of embarkation free of charge, if the shipment meets the minimum requirement. All subsequent freight charges will be at the customer's expense, shipped collect.

Because of the fluctuation of fuel prices, we reserve the right to impose fuel surcharges for any shipments.

Freight Damage

We are not responsible for product damage occurring in transit or during storage. Before accepting a shipment from the carrier, carefully review the packing list and inspect the quantity and condition of the items. Promptly document all visible damage on the Bill of Lading and request a carrier inspection of the product. In the event of damage, accept the order and contact Customer Experience for issue resolution. Concealed damage must be reported in writing within 60 days of accepting delivery. We will take all reasonable steps to assist customers in resolving claims for loss or damage.

Smart Delivery

Smart Delivery provides precise order delivery within a customer-specified date and time window. This special service is available in the contiguous U.S. and includes inside delivery, non-dock delivery, weekend delivery and residential delivery.

Requests must be made prior to an order being scheduled for production. A Smart Delivery fee will be added to the original order invoice. Any changes to a submitted Smart Delivery order will require a new Smart Delivery quote request. Not all change requests can be honored. Changes to an order will result in delays and/or additional costs once the order is in transit.

The Smart Delivery fee will be refunded if the shipment does not arrive within the specified delivery window. We will not be held responsible for costs or damages associated with delayed deliveries.

Please contact Customer Experience to request a Smart Delivery quote or for more information.

Will Call

Customers with Will Call orders will be notified once orders are ready to be picked up. Customers will have three business days from notification to pick up the order. If the order is not picked up within this time frame, storage charges will start at a rate of $30 per business day until the order has been claimed.

Invoicing

Invoicing is triggered when the product ships.

CAL 133

Fire safety is a top priority for us. SitOnIt Seating strongly supports CAL 133 standards and makes it easy for designers and buyers to specify CAL 133 chairs.

TB 117

Under California law, all upholstered furniture must meet TB 117-2013 by January 1, 2015. At a minimum, all SitOnIt Seating fabrics, vinyl, leathers and resilient filling material (i.e., foam and Dacron) meet TB 117-2013. Unlike TB 117-2013, which tests only the inner upholstery components, with CAL 133 the entire piece of furniture must withstand ignition from a gas burner inside a testing chamber.

What is CAL 133?

CAL 133 is a standard of furniture flammability started by the California Bureau of Home Furnishings and Thermal Insulation for furniture used in public buildings such as healthcare facilities, convalescent homes, public assembly areas of hotels and motels, hospitals, board and care homes, stadiums, licensed child care facilities, prisons and jails.

Notice: Starting January 1, 2020, the State of California changed regulations to ban flame retardants in upholstered furniture sold in California. We anticipate further regulatory changes in other states. The TB-133 barrier material used in our products is a flame-retardant fabric designed to pass open-flame testing protocols. The cotton/fiberglass knit is infused with a phosphorus flame retardant and coated with a chemical that expands in heat to create a physical flame barrier. The TB-133 barrier material that we use in our products is free of halogenated flame retardants, polybrominated diphenyl ethers (PBDE), formaldehyde, and antimony.

Choosing CAL 133 Textiles

Consult the individual SitOnIt Seating fabric cards to review the specifications for each fabric offered. Because we offer such a vast array of fabrics with varying degrees of flame retardancy, we suggest you consult the published technical data of the fabric supplier when making your fabric selection.

Specify CAL 133 textiles in the Material section of the Final Price Calculation worksheet or on your purchase order.

SitOnIt Seating assumes no responsibility for the flame retardancy of any customer-provided textile.

CAL 133 Testing

CAL 133 is a full-scale fire test for furniture manufactured for use in public buildings. The standards do not specify how to construct furniture, but only how it should perform when tested. To pass this fire standard test, a fire blocking liner is sandwiched between the foam and the fabric of our chairs. This liner acts as a fire extinguisher by smothering the flame.

COM/COL compliance for the CAL 133 models listed on the following page can be determined by specifying upholstery with the exact characteristics as approved SitOnIt Seating fabrics and leathers or by conducting a full chair burn test. The nondiscountable test fee for each chair-textile combination is listed below. The lead time for testing is four weeks.

Task and Side Chairs/Stools: $600
Lounge: $800

For more information on TB 117-2013 and CAL 133, visit the State of California Department of Consumer Affairs website.

To Order CAL 133

Allow a 10-day lead time. Clearly specify CAL 133 on your order. For each chair, add the appropriate additional charge.

CAL 133 Materials

- **CAL 133 LEATHER:** All carded leather is CAL 133 approved.
- **CAL 133 TEXTILES:** Over a thousand CAL 133 approved textiles in all grades, colors and styles are listed on the SitOnIt Seating website. Visit sitonit.net and search textiles by CAL 133 compliance, manufacturer, grade, lead time and other attributes.

To Check Seating for CAL 133

To determine whether your current SitOnIt Seating chair meets CAL 133, or to check an order you have recently received, check the bottom of the chair seat pan for the label shown below. If your chair does not have this tag, your chair does not meet CAL 133.

NOTICE

This Article is manufactured for use in public occupancies and meets the flammability requirement of California Bureau of Home Furnishings technical bulletin 133. Care should be exercised near open flame or with burning cigarettes.

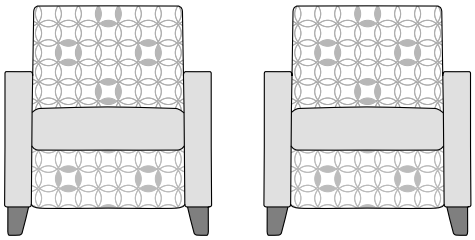
Unmatched Matching®

Textiles can be everything. With the right fabrics, you can provide atmosphere, create cohesiveness and offer an unforgettable experience across many spaces and places.

Fabric color, alignment, texture, orientation and pattern all play a part—and need to line up or match perfectly (especially with field-replaceable parts). With PatternMatch and pattern orientation, you can rest assured that every part of every chair can be traded out easily without disrupting design.

PatternMatch®

We ensure that design elements of the back, seat and arms match and/or align between seat and back. The patterns or lines also match unit-to-unit.

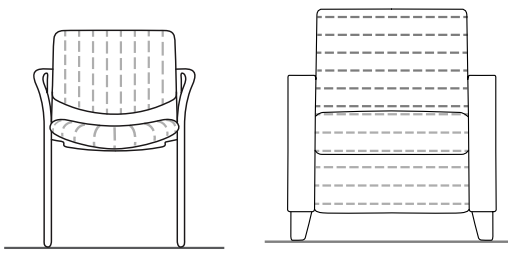


Pattern Orientation

All fabric (vertical, horizontal or bi-directional pattern) will be applied in the direction shown on the fabric manufacturer's website, unless otherwise specified.

To ensure desired fabric direction, use the Custom Upholstery Order Form on 20 and check the appropriate box under the “Pattern Orientation” section.

When we apply a textile pattern with lines at a 90-degree angle (vertically and/or horizontally) to the back and seat of a chair, we strive to achieve full alignment. Some small variations can occur due to the shape and size of the product. Pattern Orientation is standard for SitOnIt Seating.



Multi-Upholstery

The multi-upholstery option allows one fabric to be selected for the back and a different fabric for the seat. Multi-upholstery lounge pricing is different than multi-upholstery pricing for task and side seating.

Task and Side

- Upholstery pricing is based on both seat and back being the same textile. If the material is COM/COL or more than one textile is used:
  If two fabrics of the same grade are chosen,
  one grade level will be added to the upholstery price.
  Example: grade 4 for the seat and a different grade 4 for the back, the upholstery price will be grade 5 for both.

  If two fabrics of different grades are chosen,
  the final upholstery price will be based on the highest grade.
  Example: grade 2 for the seat and grade 3 for the back, the upholstery price will be grade 3 for both.

  The above upcharges only apply to chairs that have both the seat and back upholstered.

Lounge and cora

- A standard upcharge applies to all multi-upholstery orders. Different fabrics and grades may be combined because each back, seat, arm and valance are separately priced.
- Add the single multi-upholstery upcharge to the cost of the components. Example: upcharge + any grade price for the seat + any grade price for the back + any grade price for the arm.

Moisture Barrier

Accidents happen. To help protect your investment, moisture barrier for seats and backs is an option on all lounge seating products.

Specify moisture barrier seats and/or backs in the Material section of the Final Price Calculation worksheet or on your purchase order. Note that specification and pricing are separate for seat and back and apply to each single seat or back position.

COM/COL Warranty

Any textiles applied to furniture orders through the COM/COL process will not be covered under warranty by SitOnIt Seating. Any warranty claims for these upholstery materials will fall to the original vendor of the fabric. With a broad spectrum of harsh cleaning agents used by facilities, SitOnIt Seating recommends that the owner test each fabric selection with their specific cleaning methods before using. Additionally, SitOnIt Seating is not held responsible for receipt of defective fabrics, as we apply all COM as first-quality goods.

CAL 117 Policy

SitOnIt Seating assumes no responsibility for the fire retardancy of any COM/COL. Customers are solely responsible for making sure that their COM/COL complies with all applicable codes and regulations. For information on CAL 133, refer to page .

COM/COM Excess Yardage

SitOnIt Seating is not responsible for yardage submitted to us beyond the required amount. Excess COM/COL materials will be discarded at the discretion of SitOnIt Seating unless otherwise instructed by the customer at the time the order is placed. If a customer requires the COM/COL excess yardage returned, they must contact Customer Experience to make arrangements. The customer will be responsible for delivery charges.

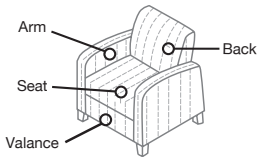
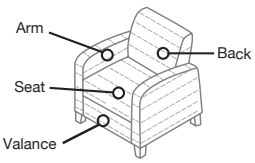
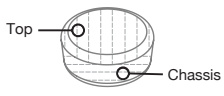
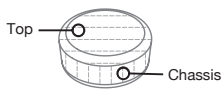
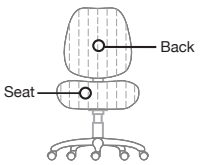
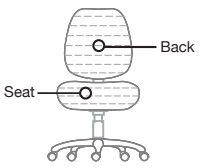
Vertical or Off the Roll	Horizontal or Railroaded
			












COM CALCULATION

Steps to Calculate COM Yardage.

1. Determine which products are being ordered as COM.
2. Find the yardage needed to upholster those products from the COM Yardage Requirement charts.
3. Adjust the yardage requirement total based on the repeat of the fabric roll using the COM Repeat Calculation table.
4. Take the final calculation and round up to the nearest half-yard to get final yardage.

For orders of 10 or more seats, contact Customer Experience for further quoting.

COM Repeat Calculation.

Use the guide below to calculate the percentage of extra upholstery required to cover large repeats.

Repeat	Railroaded/Horizontal OR Vertical/Off The Roll
5.1"– 7"	10%
7.1"–10"	15%
10.1"–14"	20%
14.1"–20"	30%
20.1"–27"	45%

Yardage requirements listed in this document are based on textile bolts/rolls that are 54" wide. Please contact Customer Experience if goods are a width other than 54".

COM Calculation Example

Below is a hypothetical scenario for how total COM yardage should be determined. This example is for a patterned textile that has a repeat.

STEP 1: DETERMINE WHICH PRODUCTS ARE BEING ORDERED AS COM

For this example order, we'll assume we need to order: 20 units of Freelance 4-leg—backs only.

STEP 2: DETERMINE THE COM YARDAGE REQUIREMENT

Looking at the COM Yardage Requirements chart that begins on page 22, we see that the following yardage amounts are needed for each product:

Freelance 4-leg chair back = 0.94 yards.
Now we multiply 0.94 yards by the 20 chair backs and we get a total of 18.8 yards.

STEP 3: ADJUST THE YARDAGE REQUIREMENT TOTAL BASED ON REPEAT

Since the textile we've chosen is a pattern with a repeat, we should look at the COM Repeat Calculation table to determine our multiplier. For this example, let's assume our repeat is 11" and we're upholstering the fabric vertical/off-the-roll. Based on the table, the multiplier is 20%. Now, we need to take the 18.8 yards from step two and increase it by 20%. An easy way to calculate this is by multiplying 18.8 by 1.2, which gives us 22.6 yards.

STEP 4: ROUND TO GET THE FINAL AMOUNT NEEDED

To determine how much yardage is needed to complete this order, we take the amount from step three and round it to the nearest half-yard. In this case, that means the customer needs to send SitOnIt Seating 23 yards to complete this order.

COM/COL YARDAGE: TASK AND CONFERENCE

Combining upholstery is an option on all SitOnIt Seating upholstered products. Below are tables outlining the fabric or vinyl requirements for the entire chair as well as individual pieces. All yardage requirements are quoted in terms of yards for fabric or vinyl and square feet for leather. Please contact Customer Experience for order quantities greater than 10 seats.

CUSTOM FINISH PROGRAM

Pricing

First-time custom stains must be approved before acceptance of an order. A one-time set-up fee applies. Thereafter, a stain-to-match upcharge is applied to each chair.

LOUNGE

One-time set-up fee: $275
Stain-to-match upcharge: $70 List

Ordering

When ordering, enter the approved STAIN ID# in the Material section of the Final Price Calculation worksheet or on your purchase order.

Custom Finish Terms and Conditions

Wood is inherently beautiful because of natural variations in color, grain and texture. There may be minor differences from one chair to the next, even though they are finished at the same time. We cannot guarantee exact matches of grain or natural wood color.

Approval Process

Since all new stains must be approved before they can be applied to seating or tables, allow extra time for custom finishes. Custom finishes generally require at least one to two weeks to create a matched sample. We will need a signed Approval Form before we can accept your order. We reserve the right to decline the opportunity to match a finish color.

1. Send a 3" × 4" or 4" × 6" sample of the stain, along with the model numbers and options to which the finish will be applied, to:

   Customer Experience
   Custom Finish Program
   6415 Katella Avenue
   Cypress, CA 90630

   Include dealer name, contact and project reference.

2. Once approved, we will send a finish sample to you along with any caveats that may apply. We will keep an identical sample in our files for future orders. Custom finishes generally require at least a week to create a matched sample.
3. Carefully review the sample. Note the STAIN ID# (example: SM#070214-1); this will be needed for your order. Return the signed approval form to Customer Experience along with your order. We need your approval before we can accept the order, schedule it for production or acknowledge a ship date.
4. Lounge orders using our stain-to-match program will have a lead time of 15 days.

Due to the high-gloss material, the piano black Y-support (YCC04) is more susceptible to scratches and scuffs in a workstation environment and requires more care when removing protective packaging. Scratches and scuffs may not be covered under warranty.

Accent color is applied to pull handle stripe, lumbar casing, arm adjustment and caster rings.

Mika

MULTIPURPOSE CHAIR, COUNTER STOOL AND BAR STOOL

Design above.

Mika sits above most others in its class—and not just because it was a multi-award winner. Mika is elevated. Upholstered or non-upholstered, it reaches new heights in what a molded shell chair can be. From top to bottom, the design flows. Back and forth, the design rocks with 15 degrees of flex. Up and up, the design pushes an upholstered seat farther than ever before. And in the end, you arrive at a place of sit-ability and stack-ability hard to find in something that looks this good.

LINKING TABLES

High traffic. Low stress.

Tables are like bridges joining chairs and multiseating elements. Connect like items together or mix them up. For instance, a table can link to a guest or patient chair on one side and a pre-configured, freespan, start or end element on the other. In a start/center/end configuration, a table must connect to either a start or an end. End tables have two legs and 90° radius and square tables have one leg.

GLIDE GUIDE

For almost 25 years, SitOnIt Seating products have been expertly designed to provide the best comfort and support in the industry.

Glides are an often overlooked element in the seating specification process, but they play a crucial role in ensuring proper interface between the chair and the floor.

This application guide offers general guidelines to assist customers with choosing the best glide for their needs. The guide is based on extensive lab testing and hands-on experience with selling chairs in a variety of environments, as well as review and consultations with glide experts.

This Application Guide is provided for informational purposes only. Always follow the manufacturer's instructions for care and maintenance of your flooring. Periodic inspection and maintenance of glides is critical to minimize the risk of damage to your flooring, especially when using glides with floors that are prone to scratching and marring. Testing was performed under simulated conditions. Because a wide range of factors impact actual performance, including how your chairs are used; the state of the glides and flooring; and dirt, moisture and other environmental factors, Exemplis does not warrant you will achieve any specific result. Actual results may vary.

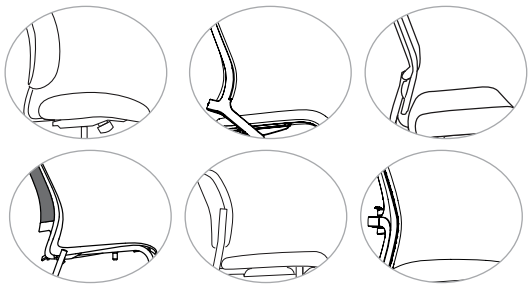
ARM ADJUSTMENT GUIDE

SitOnIt Seating offers a wide variety of arm styles and adjustments to accommodate all types of users doing a wide variety of tasks. The general adjustments for each arm type are described below. See the website or the product hang tag for specifics.

Armless

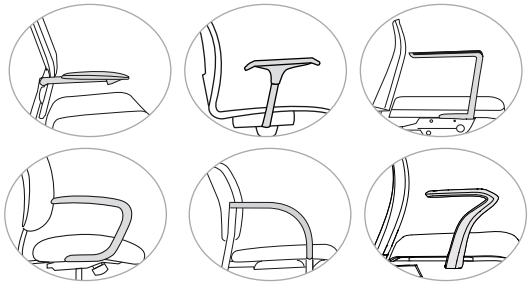
Any discussion of arm styles must begin with armless. Armless chairs and stools are less expensive and are easier to get in and out of. However, they do not provide ergonomic support for long-term sitting and task functions.



Most chairs and stools are available armless, but the selection may be limited to specific models. For instance, Freelance multipurpose chairs and stools can be specified armless, but not Freelance bariatric chairs.

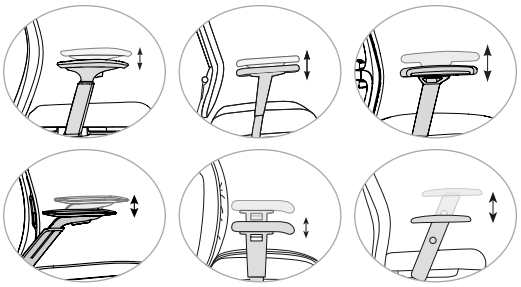
Fixed

As the name implies, fixed arms cannot be adjusted. Also known as loop arms, cantilever arms and other names, these arms are commonly found on side and multi-seating as well as basic task seating.



Height-Adjustable

This is the most basic adjustable arm. The arm adjusts up or down. Height-adjustable arms are best for basic task work.



INSTRUCTIONS:

Glove Active, Knack, Non-Stop Heavy Duty, ReAlign, TR2 and Vectra

- To increase or decrease the arm height, press the button and pull up or push down on the arm.

Amplify, Focus, Focus 2.0, Vectra and Wit

- To increase arm height, press the button located under the front of the arm pad and pull the arm up.
- To decrease arm height, press the button located under the front of the arm pad and push the arm down.

Height-adjustable arms are available for Amplify, Focus, Focus 2.0, Glove Active, Knack, Non-Stop Heavy Duty, Novo, ReAlign, TR2, Vectra and Wit.

ARM ADJUSTMENT GUIDE

Height-/Width-Adjustable | Multi-Adjustable

Height-/width-adjustable arms are sometimes called multi-adjustable arms on certain products. The arm adjusts up and down and side to side. This provides more “elbow room” for larger people. Best for basic task work.

INSTRUCTIONS:

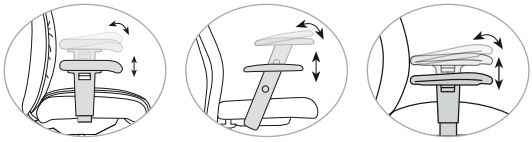
- Height: See instructions in the height-adjustable section.
- Width: To adjust the arm width, push down the lever located under the seat to unlock the width adjustment. Move the arm to the desired width and pull up the lever to lock the arm in place.

Height-/width-adjustable arms are available for Focus, Glove Active, Knack, Non-Stop Heavy Duty, ReAlign and TR2.

Multi-adjustable arms are available for Amplify, Focus 2.0, Novo, Torsa and Vectra.

Height-Adjustable With Pivot

The arm adjusts up and down and 30-degrees in or out. The arms can be turned in to facilitate writing or keyboarding and turned out for other tasks.



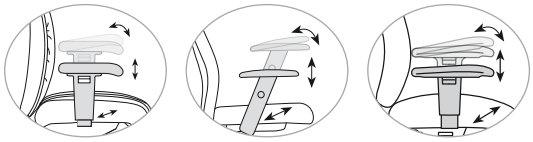
INSTRUCTIONS:

- Height: To increase or decrease the arm height, press the button.
- Pivot: The armrest has three positions: 30-degrees in, center or 30-degrees out. To pivot the arm, grasp the arm pad and move it to one of the three positions.

Height-adjustable arms with pivot are available for Glove Active, ReAlign and TR2.

Height-/Width-Adjustable With Pivot | Multi-Adjustable (Height/Width) With Pivot

This arm adjusts up and down, side to side and 30° in or out.



INSTRUCTIONS:

- Height: The arm adjusts up or down. To increase or decrease the arm height, press the button.
- Width: The arm adjusts side to side. To adjust the arm width, push down the lever located under the seat to unlock the width adjustment. Move the arm to the desired width and pull up on the lever to lock the arm in place.
- Pivot: The armrest has three positions: 30° in, center or 30° out (Non-Stop Heavy Duty pivots 15-degrees). To pivot the arm, grasp the arm pad and move it to one of the three positions.

Height-/width-adjustable arms with pivot are available for Glove Active, Non-Stop Heavy Duty, ReAlign and TR2.

Height-Adjustable Break-Away

The arm adjusts up or down and folds down 90-degrees. The folding arm allows for fast and easy ingress and egress and is also great for users with large key rings, tool belts or other personal gear.

INSTRUCTIONS:

- Height: The arm adjusts up or down. To increase or decrease the arm height, press the button.
- Break-Away: To fold the arm back, push down the lever located under the seat to unlock the arm and move the arm back. To return the arm to the original position, pull the arm up until it locks into place.

Height-adjustable break-away arms are available for Non-Stop Heavy Duty (stool only).

ARM ADJUSTMENT GUIDE

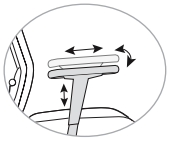
Multi-Adjustable (Height/Width) Articulating

The articulating arm adjusts up and down and side to side while the arm pad pivots left and right.

Non-Stop Heavy Duty offers a multi-adjustable articulating arm option.

Fully Adjustable (6-Way)

The six fully adjustable arm adjustments are arm height (up/down), arm pad depth (forward/back) and arm pad side to side (in/out). This ergonomic arm is good for users engaged in a variety of task applications.



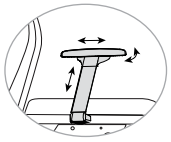
INSTRUCTIONS:

- Height: The arm adjusts up or down. To increase or decrease the arm height, press the button.
- Arm pad depth: The arm pad slides forward or back.
- Width: The arm adjusts side to side.

Fully adjustable (6-way) arms with arm pad depth adjustment are available exclusively on Focus.

Fully Adjustable (6-Way) With Pivot

The six fully adjustable arm adjustments are arm height (up/down), arm pad depth (forward/back) and pivot. This ergonomic arm is good for users engaged in a variety of task applications.



INSTRUCTIONS:

- Height: The arm adjusts up or down. To increase or decrease the arm height, press the button.
- Arm pad depth: The arm pad slides forward or back.
- Pivot: The armrest has three positions: 25° in, center, or 25° out.

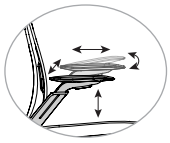
Fully Adjustable (8-Way)

The 8-way fully adjustable arms go up/down for height adjustment while the arm pads go forward/back, in/out and pivot in/out for robust support. This all-encompassing arm style makes a perfect fit for today's workplace where broader work applications such as use of smartphones, tablets and other tech accessories are becoming the norm (and require complete forearm support). Pivoting of the arm pads also means that even the most petite of users can adjust accordingly for a more suitable fit.



INSTRUCTIONS:

- Height: The arm adjusts up or down. To increase or decrease the arm Height: The arm goes up or down for height adjustment.
- Arm pad depth: The arm pad slides forward or backward.
- Arm pad lateral: The arm pad moves in and out. Not to be confused with the arm width adjustment where the entire arm moves.
- Arm pad pivot: The arm pad pivots in and out to accommodate various work application postures.

Safety First

To ensure proper cleaning and/or disinfecting, it's important to consult with facilities or safety personnel and follow the manufacturer's instructions—including detailed dilution requirements, safe application instructions, dwell time for effective disinfecting and more.

Per CDC instructions, always read and follow the directions on the label to ensure safe and effective use.

- Wear skin protection and consider eye protection for potential splash hazards
- Ensure adequate ventilation
- Use no more than the amount recommended on the label
- Use water at room temperature for dilution (unless stated otherwise on the label)
- Avoid mixing chemical products
- Label diluted cleaning solutions
- Store and use chemicals out of the reach of children and pets

Always read and follow the directions on the cleaner/disinfectant labels to ensure safe and effective use.

Clean + Disinfect

Cleaning and disinfecting are two distinct actions, and knowing the difference between the two can help promote safety in any space. This comprehensive, 2-step process requires cleaning before disinfecting.

Clean

CLEANING REMOVES GERMS

- The act of removing visible dirt and debris from objects or surfaces
- Cleaning works by using soap/detergent with water to remove impurities from surfaces either manually or mechanically
- Cleaning does not kill germs, but by removing them, it lowers their numbers and risk of spreading infection

Clean (Cont.)

CLEANING GUIDELINES AND TIPS

- Start by lightly dusting with a soft, grit-free cloth or chamois (no wiping)
- After dusting, dampen cloth or chamois with a solution of mild, non-abrasive liquid soap and water
- Wipe clean and dry with a soft, grit-free cloth, sponge or chamois
- Avoid using abrasive cleaners and steel wool to prevent scratching
- Test any cleaning method or agent in an inconspicuous area of the surface

Disinfect

DISINFECTING KILLS GERMS

- This process comes after a surface is cleaned
- Disinfecting kills germs on objects or surfaces with the use of chemicals
- Most common disinfectants include one of the following active ingredients: Quaternary Ammonium (Quats), Sodium Hypochlorite (Bleach), Hydrogen Peroxide, or 70% Isopropyl Alcohol
- EPA-registered disinfectants List N: Disinfectants for Use Against SARS-CoV-2

DISINFECTING GUIDELINES AND TIPS

- Follow the disinfectant manufacturer's instructions when applying the agent
- Once finished, remove all disinfecting agents from the surface with water and a grit-free cloth, then dry
- If not properly removed, disinfectant residue could degrade product life and appearance

Cleaning + Disinfecting efforts should be part of an organization's comprehensive systems-based approach to provide a safe and sustainable workspace.

Cleaning Our Hard Surfaces

Over 95% of the hard surfaces on our products can be cleaned/disinfected using any one of the four primary ingredients listed below.

EXAMPLES OF HARD SURFACES THAT CAN BE DISINFECTED:

- Plastics (i.e. polyurethane and acrylic)
- Solid Surface
- Metals
- Painted Surfaces
- Laminate

EXCEPTIONS:

- Markerboard

Clean + Disinfect

Cleaning and disinfecting are two distinct actions, and knowing the difference between the two can help promote safety in any space. This comprehensive, 2-step process requires cleaning before disinfecting.

Cleaning Our Soft Surfaces

Our textiles and meshes offer a performance and cleaning story unmatched in the industry.

Our Carded Textile Program offers over 700 bleach-cleanable fabrics through our SitOnIt Seating private label and partership textile program.

MESH:

- All of our mesh materials are bleach-cleanable. This determination is supported by 3rd-party results from completing AATCC 188 Colorfastness to Bleach testing where the subject material is submersed, and friction stirred in a diluted sodium hypochlorite solution.
- Cleaning of our mesh materials varies. Check out the Mesh Spec + Care Guide on our website for more information.

SEATING FABRICS:

- Soft surfaces on seating can vary widely from woven, knits and leather to coated textiles such as vinyl and polyurethane. Woven and knits tend to be more permeable than vinyl or polyurethane.
- Cleaning of our seating fabric materials varies. For a list of our textile spec + care guides, see the Materials Downloads on our website.
- For a list of bleach-cleanable materials, see our Carded Library and select "Bleach Cleanable" u nder performance.

SCREEN FABRICS:

LAMINATE CARE AND CLEANING

Clean

CLEANING GUIDELINES AND TIPS

Thermally fused melamine finished panels may be easily cleaned using a mild, non-abrasive, all-purpose cleaner and a soft cloth.

Coffee, tea or other difficult stains may be removed using a mild household detergent or a paste of baking soda and water.

Note: 10–20 strokes should remove most stains, excessive force or scrubbing may damage the surface.

NO HARSH CHEMICALS

Should the surface come in contact with drain, toilet or oven cleaner, immediately remove the chemical, rinse thoroughly and wipe dry.

NO ABRASIVES

Abrasives such as scouring pads or gritty cleansers may permanently dull and/or scratch the surface and result in future staining.

Protect

AVOID HEAT

Do not place hot cookware, dishes or objects onto the surface. Protect surfaces from heat with an insulating pad or trivet.

NOTHING SHARP

Knives and other sharp objects used directly on the surface can also be damaging. Protect surfaces from sharp objects with a chopping block or counter protector.
