SitOnIt Seating: (888) 274-8664

Fire safety is a top priority for us. SitOnIt Seating strongly supports CAL 133 standards and makes it easy for designers and buyers to specify CAL 133 chairs.

TB 117

Under California law, all upholstered furniture must meet TB 117-2013 by January 1, 2015. At a minimum, all SitOnIt Seating fabrics, vinyl, leathers and resilient filling material (i.e., foam and Dacron) meet TB 117-2013. Unlike TB 117-2013, which tests only the inner upholstery components, with CAL 133 the entire piece of furniture must withstand ignition from a gas burner inside a testing chamber.

What is CAL 133?

CAL 133 is a standard of furniture flammability started by the California Bureau of Home Furnishings and Thermal Insulation for furniture used in public buildings such as healthcare facilities, convalescent homes, public assembly areas of hotels and motels, hospitals, board and care homes, stadiums, licensed child care facilities, prisons and jails.

Notice: Starting January 1, 2020, the State of California changed regulations to ban flame retardants in upholstered furniture sold in California. We anticipate further regulatory changes in other states. The TB-133 barrier material used in our products is a flame-retardant fabric designed to pass open-flame testing protocols. The cotton/fiberglass knit is infused with a phosphorus flame retardant and coated with a chemical that expands in heat to create a physical flame barrier. The TB-133 barrier material that we use in our products is free of halogenated flame retardants, polybrominated diphenyl ethers (PBDE), formaldehyde, and antimony.

Choosing CAL 133 Textiles

Consult the individual **SitOnIt Seating fabric cards** to review the specifications for each fabric offered. Because we offer such a vast array of fabrics with varying degrees of flame retardancy, we suggest you consult the published technical data of the fabric supplier when making your fabric selection.

Specify CAL 133 textiles in the Material section of the Final Price Calculation worksheet or on your purchase order.

SitOnIt Seating assumes no responsibility for the flame retardancy of any customer-provided textile.

CAL 133 Testing

CAL 133 is a full-scale fire test for furniture manufactured for use in public buildings. The standards do not specify how to construct furniture, but only how it should perform when tested. To pass this fire standard test, a fire blocking liner is sandwiched between the foam and the fabric of our chairs. This liner acts as a fire extinguisher by smothering the flame.

COM/COL compliance for the CAL 133 models listed on the following page can be determined by specifying upholstery with the exact characteristics as approved SitOnIt Seating fabrics and leathers or by conducting a full chair burn test. The nondiscountable test fee for each chair-textile combination is listed below. The lead time for testing is four weeks.

Task and Side Chairs/Stools: \$600
Lounge: \$800

For more information on TB 117-2013 and CAL 133, visit the **State of California Department of Consumer Affairs** website.

To Order CAL 133

Allow a 10-day lead time. Clearly specify CAL 133 on your order. For each chair, add the appropriate additional charge.

CAL 133 Materials

- **CAL 133 LEATHER:** All carded leather is CAL 133 approved.
- **CAL 133 PLASTIC:** All our plastic chairs are CAL 133 approved except for our Achieve and Baja collections.
- **CAL 133 TEXTILES:** Over a thousand CAL 133 approved textiles in all grades, colors and styles are listed on the SitOnIt Seating website. Visit sitonit.net and search textiles by CAL 133 compliance, manufacturer, grade, lead time and other attributes.

To Check Seating for CAL 133

To determine whether your current SitOnIt Seating chair meets CAL 133, or to check an order you have recently received, check the bottom of the chair seat pan for the label shown below. If your chair does not have this tag, your chair does not meet CAL 133.

NOTICE

This Article is manufactured for use in public occupancies and meets the flammability requirement of California Bureau of Home Furnishings technical bulletin 133. Care should be exercised near open flame or with burning cigarettes.

Unmatched Matching®

Textiles can be everything. With the right fabrics, you can provide atmosphere, create cohesiveness and offer an unforgettable experience across many spaces and places.

Fabric color, alignment, texture, orientation and pattern all play a part—and need to line up or match perfectly (especially with field-replaceable parts). With PatternMatch and pattern orientation, you can rest assured that every part of every chair can be traded out easily without disrupting design.

PatternMatch®

We ensure that design elements of the back, seat and arms match and/or align between seat and back. The patterns or lines also match unit-to-unit.

Pattern Orientation

All fabric (vertical, horizontal or bi-directional pattern) will be applied in the direction shown on the fabric manufacturer's website, unless otherwise specified.

To ensure desired fabric direction, use the Custom Upholstery Order Form on page 20 and check the appropriate box under the "Pattern Orientation" section.

When we apply a textile pattern with lines at a 90-degree angle (vertically and/or horizontally) to the back and seat of a chair, we strive to achieve full alignment. Some small variations can occur due to the shape and size of the product. Pattern Orientation is standard for SitOnIt Seating.

Multi-Upholstery

The multi-upholstery option allows one fabric to be selected for the back and a different fabric for the seat. Multi-upholstery lounge pricing is different than multi-upholstery pricing for task and side seating.

TASK AND SIDE

- Upholstery pricing is based on both seat and back being the same textile. If the material is COM/COL or more than one textile is used:

If two fabrics of the same grade are chosen,

one grade level will be added to the upholstery price.

Example: grade 4 for the seat and a different grade 4 for the back, the upholstery price will be grade 5 for both.

If two fabrics of different grades are chosen,

the final upholstery price will be based on the highest grade.

Example: grade 2 for the seat and grade 3 for the back, the upholstery price will be grade 3 for both.

The above upcharges only apply to chairs that have both the seat and back upholstered.

LOUNGE AND CORA

- A standard upcharge applies to all multi-upholstery orders. Different fabrics and grades may be combined because each back, seat, arm and valance are separately priced.
- Add the single multi-upholstery upcharge to the cost of the components. Example: upcharge + any grade price for the seat + any grade price for the back + any grade price for the arm.

Moisture Barrier

Accidents happen. To help protect your investment, moisture barrier for seats and backs is an option on all lounge seating products.

Specify moisture barrier seats and/or backs in the Material section of the Final Price Calculation worksheet or on your purchase order. Note that specification and pricing are separate for seat and back and apply to each single seat or back position.

COM/COL Warranty

Any textiles applied to furniture orders through the COM/COL process will not be covered under warranty by SitOnIt Seating. Any warranty claims for these upholstery materials will fall to the original vendor of the fabric. With a broad spectrum of harsh cleaning agents used by facilities, SitOnIt Seating recommends that the owner test each fabric selection with their specific cleaning methods before using. Additionally, SitOnIt Seating is not held responsible for receipt of defective fabrics, as we apply all COM as first-quality goods.

CAL 117 Policy

SitOnIt Seating assumes no responsibility for the fire retardancy of any COM/COL. Customers are solely responsible for making sure that their COM/COL complies with all applicable codes and regulations. For information on CAL 133, refer to page .

COM/COL Excess Yardage

SitOnIt Seating is not responsible for yardage submitted to us beyond the required amount. Excess COM/COL materials will be discarded at the discretion of SitOnIt Seating unless otherwise instructed by the customer at the time the order is placed. If a customer requires the COM/COL excess yardage returned, they must contact Customer Experience to make arrangements. The customer will be responsible for delivery charges.

COM CALCULATION

Steps to Calculate COM Yardage.

1. Determine which products are being ordered as COM.
2. Find the yardage needed to upholster those products from the COM Yardage Requirement charts.
3. Adjust the yardage requirement total based on the repeat of the fabric roll using the COM Repeat Calculation table.
4. Take the final calculation and round up to the nearest half-yard to get final yardage.

For orders of 10 or more seats, contact Customer Experience for further quoting.

COM Repeat Calculation.

Use the guide below to calculate the percentage of extra upholstery required to cover large repeats.

Repeat	Railroaded/Horizontal OR Vertical/Off The Roll
5.1"–7"	10%
7.1"–10"	15%
10.1"–14"	20%
14.1"–20"	30%
20.1"–27"	45%

Yardage requirements listed in this document are based on textile bolts/rolls that are 54" wide. Please contact Customer Experience if goods are a width other than 54".

COM Calculation Example

Below is a hypothetical scenario for how total COM yardage should be determined. This example is for a patterned textile that has a repeat.

STEP 1: DETERMINE WHICH PRODUCTS ARE BEING ORDERED AS COM

For this example order, we'll assume we need to order: 20 units of Freelance 4-leg—backs only.

STEP 2: DETERMINE THE COM YARDAGE REQUIREMENT

Looking at the COM Yardage Requirements chart that begins on page 22, we see that the following yardage amounts are needed for each product:

Freelance 4-leg chair back = 0.94 yards.

Now we multiply 0.94 yards by the 20 chair backs and we get a total of 18.8 yards.

STEP 3: ADJUST THE YARDAGE REQUIREMENT TOTAL BASED ON REPEAT

Since the textile we've chosen is a pattern with a repeat, we should look at the COM Repeat Calculation table to determine our multiplier. For this example, let's assume our repeat is 11" and we're upholstering the fabric vertical/off-the-roll. Based on the table, the multiplier is 20%. Now, we need to take the 18.8 yards from step two and increase it by 20%. An easy way to calculate this is by multiplying 18.8 by 1.2, which gives us 22.6 yards.

STEP 4: ROUND TO GET THE FINAL AMOUNT NEEDED

To determine how much yardage is needed to complete this order, we take the amount from step three and round it to the nearest half-yard. In this case, that means the customer needs to send SitOnIt Seating 23 yards to complete this order.

COM/COL YARDAGE: TASK AND CONFERENCE

Combining upholstery is an option on all SitOnIt Seating upholstered products. Below are tables outlining the fabric or vinyl requirements for the entire chair as well as individual pieces. Pricing

First-time custom stains must be approved before acceptance of an order. A one-time net fee applies if stains are not in our library. Thereafter, a stain-to-match upcharge is applied to each chair.

LOUNGE

Stain not in our library: \$275 Net
Stain-to-match upcharge: \$70 List

Ordering

When ordering, enter the approved STAIN ID# in the Material section of the Final Price Calculation worksheet or on your purchase order.

Custom Finish Terms and Conditions

Wood is inherently beautiful because of natural variations in color, grain and texture. There may be minor differences from one chair to the next, even though they are finished at the same time. We cannot guarantee exact matches of grain or natural wood color.

Approval Process

Since all new stains must be approved before they can be applied to seating or tables, allow extra time for custom finishes. Custom finishes generally require at least one to two weeks to create a matched sample. We will need a signed Approval Form before we can accept your order. We reserve the right to decline the opportunity to match a finish color.

1. Send a 3" x 4" or 4" x 6" sample of the stain, along with the model numbers and options to which the finish will be applied, to:

Customer Experience
Custom Finish Program
6415 Katella Avenue
Cypress, CA 90630

Include dealer name, contact and project reference.

2. Once approved, we will send a finish sample to you along with any caveats that may apply. We will keep an identical sample in our files for future orders. Custom finishes generally require at least a week to create a matched sample.
3. Carefully review the sample. Note the STAIN ID# (example: SM#070214-1); this will be needed for your order. Return the signed approval form to Customer Experience along with your order. We need your approval before we can accept the order, schedule it for production or acknowledge a ship date.
4. Lounge orders using our stain-to-match program will have a lead time of 15 days.

Mika

MULTIPURPOSE CHAIR, COUNTER STOOL AND BAR STOOL

Design above.

Mika sits above most others in its class—and not just because it was a multi-award winner. Mika is elevated. Upholstered or non-upholstered, it reaches new heights in what a molded shell chair can be. From top to bottom, the design flows. Back and forth, the design rocks with 15 degrees of flex. Up and up, the design pushes an upholstered seat farther than ever before. And in the end, you arrive at a place of sit-ability and stack-ability hard to find in something that looks this good.

LINKING TABLES

High traffic. Low stress.

Tables are like bridges joining chairs and multiseating elements. Connect like items together or mix them up. For instance, a table can link to a guest or patient chair on one side and a preconfigured, freespan, start or end element on the other. In a start/center/end configuration, a table must connect to either a start or an end. End tables have two legs and 90° radius and square tables have one leg.

GLIDE GUIDE

For almost 25 years, SitOnIt Seating products have been expertly designed to provide the best comfort and support in the industry.

Glides are an often overlooked element in the seating specification process, but they play a crucial role in ensuring proper interface between the chair and the floor.

This application guide offers general guidelines to assist customers with choosing the best glide for their needs. The guide is based on extensive lab testing and hands-on experience with selling chairs in a variety of environments, as well as review and consultations with glide experts.

- **ACCEPTABLE:** Acceptable choice for this application based on our testing but consider BETTER or BEST options.
- **NR:** Not recommended for this application based on our testing.

This Application Guide is provided for informational purposes only. Always follow the manufacturer's instructions for care and maintenance of your flooring. Periodic inspection and maintenance of glides is critical to minimize the risk of damage to your flooring, especially when using glides with floors that are prone to scratching and marring. Testing was performed under simulated conditions. Because a wide range of factors impact actual performance, including how your chairs are used; the state of the glides and flooring; and dirt, moisture and other environmental factors, Exemplis does not warrant you will achieve any specific result. Actual results may vary.

Safety First

To ensure proper cleaning and/or disinfecting, it's important to consult with facilities or safety personnel and follow the manufacturer's instructions—including detailed dilution requirements, safe application instructions, dwell time for effective disinfecting and more.

Per CDC instructions, always read and follow the directions on the label to ensure safe and effective use.

- Wear skin protection and consider eye protection for potential splash hazards
- Ensure adequate ventilation
- Use no more than the amount recommended on the label
- Use water at room temperature for dilution (unless stated otherwise on the label)
- Avoid mixing chemical products
- Label diluted cleaning solutions
- Store and use chemicals out of the reach of children and pets

Always read and follow the directions on the cleaner/disinfectant labels to ensure safe and effective use.

Clean + Disinfect

Cleaning and disinfecting are two distinct actions, and knowing the difference between the two can help promote safety in any space. This comprehensive, 2-step process requires cleaning before disinfecting.

Clean

CLEANING REMOVES GERMS

- The act of removing visible dirt and debris from objects or surfaces
- Cleaning works by using soap/detergent with water to remove impurities from surfaces either manually or mechanically
- Cleaning does not kill germs, but by removing them, it lowers their numbers and risk of spreading infection

Clean (Cont.)

CLEANING GUIDELINES AND TIPS

- Start by lightly dusting with a soft, grit-free cloth or chamois (no wiping)
- After dusting, dampen cloth or chamois with a solution of mild, non-abrasive liquid soap and water
- Wipe clean and dry with a soft, grit-free cloth, sponge or chamois
- Avoid using abrasive cleaners and steel wool to prevent scratching
- Test any cleaning method or agent in an inconspicuous area of the surface

Disinfect

DISINFECTING KILLS GERMS

- This process comes after a surface is cleaned
- Disinfecting kills germs on objects or surfaces with the use of chemicals
- Most common disinfectants include one of the following active ingredients: Quaternary Ammonium (Quats), Sodium Hypochlorite (Bleach), Hydrogen Peroxide, or 70% Isopropyl Alcohol
- EPA-registered disinfectants List N: Disinfectants for Use Against SARS-CoV-2

DISINFECTING GUIDELINES AND TIPS

- Follow the disinfectant manufacturer's instructions when applying the agent
- Once finished, remove all disinfecting agents from the surface with water and a grit-free cloth, then dry
- If not properly removed, disinfectant residue could degrade product life and appearance

Cleaning + Disinfecting efforts should be part of an organization's comprehensive systems-based approach to provide a safe and sustainable workspace.

Cleaning and disinfecting are two distinct actions, and knowing the difference between the two can help promote safety in any space. This comprehensive, 2-step process requires cleaning before disinfecting.

Cleaning Our Soft Surfaces

Our textiles and meshes offer a performance and cleaning story unmatched in the industry.

Our Carded Textile Program offers over 700 bleach-cleanable fabrics through our SitOnIt Seating private label and partnership textile program.

MESH:

- All of our mesh materials are bleach-cleanable. This determination is supported by 3rd-party results from completing AATCC 188 Colorfastness to Bleach testing where the subject material is submersed, and friction stirred in a diluted sodium hypochlorite solution.
- Cleaning of our mesh materials varies. Check out the [Mesh Spec + Care Guide](#) on our website for more information.

SEATING FABRICS:

- Soft surfaces on seating can vary widely from woven, knits and leather to coated textiles such as vinyl and polyurethane. Woven and knits tend to be more permeable than vinyl or polyurethane.
- Cleaning of our seating fabric materials varies. For a list of our textile spec + care guides, see the [Materials Downloads](#) on our website.
- For a list of bleach-cleanable materials, see our [Carded Library](#) and select "Bleach Cleanable" under performance.

SCREEN FABRICS:

- Cleaning of screen materials varies. For a list of our textile spec + care guides, see the [Materials Downloads](#) on our website.
- For a list of bleach-cleanable materials, see our [Carded Library](#) and select "Bleach Cleanable" under performance.

ARM ADJUSTMENT GUIDE

SitOnIt Seating offers a wide variety of arm styles and adjustments to accommodate all types of users doing a wide variety of tasks. The general adjustments for each arm type are described below. See the website or the product hang tag for specifics.

Armless

Any discussion of arm styles must begin with armless. Armless chairs and stools are less expensive and are easier to get in and out of. However, they do not provide ergonomic support for long-term sitting and task functions.

Most chairs and stools are available armless, but the selection may be limited to specific models. For instance, Freelance multipurpose chairs and stools can be specified armless, but not Freelance bariatric chairs.

Fixed

As the name implies, fixed arms cannot be adjusted. Also known as loop arms, cantilever arms and other names, these arms are commonly found on side and multi-seating as well as basic task seating.

Height-Adjustable

This is the most basic adjustable arm. The arm adjusts up or down. Height-adjustable arms are best for basic task work.

INSTRUCTIONS:

Glove Active, Knack, Non-Stop Heavy Duty, ReAlign, TR2 and Vectra

- To increase or decrease the arm height, press the button and pull up or push down on the arm.

Amplify, Focus, Focus 2.0, Vectra and Wit

- To increase arm height, press the button located under the front of the arm pad and pull the arm up.
- To decrease arm height, press the button located under the front of the arm pad and push the arm down.

Height-adjustable arms are available for Amplify, Focus, Focus 2.0, Glove Active, Knack, Non-Stop Heavy Duty, Novo, ReAlign, TR2, Vectra and Wit.

ARM ADJUSTMENT GUIDE

Height-/Width-Adjustable | Multi-Adjustable

Height-/width-adjustable arms are sometimes called multi-adjustable arms on certain products. The arm adjusts up and down and side to side. This provides more “elbow room” for larger people. Best for basic task work.

INSTRUCTIONS:

- Height: See instructions in the height-adjustable section.
- Width: To adjust the arm width, push down the lever located under the seat to unlock the width adjustment. Move the arm to the desired width and pull up on the lever to lock the arm in place.

Height-/width-adjustable arms are available for Focus, Glove Active, Knack, Non-Stop Heavy Duty, ReAlign and TR2.

Multi-adjustable arms are available for Amplify, Focus 2.0, Novo, Torsa and Vectra.

Height-/Width-Adjustable With Pivot | Multi-Adjustable (Height/Width) With Pivot

This arm adjusts up and down, side to side and 30° in or out.

INSTRUCTIONS:

- Height: The arm adjusts up or down. To increase or decrease the arm height, press the button.
- Width: The arm adjusts side to side. To adjust the arm width, push down the lever located under the seat to unlock the width adjustment. Move the arm to the desired width and pull up on the lever to lock the arm in place.
- Pivot: The armrest has three positions: 30° in, center or 30° out (Non-Stop Heavy Duty pivots 15-degrees). To pivot the arm, grasp the arm pad and move it to one of the three positions.

Height-/width-adjustable arms with pivot are available for Glove Active, Non-Stop Heavy Duty, ReAlign and TR2.

Height-Adjustable With Pivot

The arm adjusts up and down and 30-degrees in or out. The arms can be turned in to facilitate writing or keyboarding and turned out for other tasks.

INSTRUCTIONS:

- Height: To increase or decrease the arm height, press the button.
- Pivot: The armrest has three positions: 30-degrees in, center or 30-degrees out. To pivot the arm, grasp the arm pad and move it to one of the three positions.

Height-adjustable arms with pivot are available for Glove Active, ReAlign and TR2.

Height-Adjustable Break-Away

The arm adjusts up or down and folds down 90-degrees. The folding arm allows for fast and easy ingress and egress and is also great for users with large key rings, tool belts or other personal gear.

INSTRUCTIONS:

- Height: The arm adjusts up or down. To increase or decrease the arm height, press the button.
- Break-Away: To fold the arm back, push down the lever located under the seat to unlock the arm and move the arm back. To return the arm to the original position, pull the arm up until it locks into place.

Height-adjustable break-away arms are available for Non-Stop Heavy Duty (stool only).

ARM ADJUSTMENT GUIDE

The articulating arm adjusts up and down and side to side while the arm pad pivots left and right.

Non-Stop Heavy Duty offers a multi-adjustable articulating arm option.

This all-encompassing arm style makes a perfect fit for today's workplace where broader work applications such as use of smartphones, tablets and other tech accessories are becoming the norm (and require complete forearm support). Pivoting of the arm pads also means that even the most petite of users can adjust accordingly for a more suitable fit.

INSTRUCTIONS:

- Height: The arm adjusts up or down. To increase or decrease the arm height, press the button.
- Arm pad depth: The arm pad slides forward or backward.
- Arm pad lateral: The arm pad moves in and out. Not to be confused with the arm width adjustment where the entire arm moves.
- Arm pad pivot: The arm pad pivots in and out to accommodate various work application postures.

Fully adjustable (8-way) arms are available on Focus 2.0 and Vectra.

ARM ADJUSTMENT GUIDE
