**Explanation of ACT Icons for Upholstery**

- **Fire Retardancy**
  Flammability testing determines a fabric's resistance to burning.
  PASSED: California Technical Bulletin 117.

- **Colorfastness to Wet and Dry Crocking**
  Colorfastness to wet and dry crocking refers to the rubbing off of color from fabric onto clothing, hands or other materials; which can occur under wet or dry conditions.
  PASSED: AATCC 8-1974 Dry Crocking, Class 4 minimum; Wet Crocking, Class 3 minimum.

- **Colorfastness to Light**
  Colorfastness to light is the degree to which a fabric will retain its true color when exposed to light.
  PASSED: AATCC 16A,1974 or AATCC 16E,1976; Class 4 minimum at 40 hours.

- **Physical Properties**
  Three physical property tests include: the brush pill test to determine a fabric's tendency to pill; breaking/tenacity strength tests the ability of a fabric to withstand tension without breaking or tearing; seam slippage measures the pulling apart of fabric at the seams.

- **Abrasion**
  Abrasion is the ability of a fabric to withstand damage from wear and rubbing.
  PASSED: Heavy Duty: ASTM 3597 modified (No. 10 cotton duck); 30,000 double rubs Wyzenbeek Method or ASTM 4966 modified (with 21 oz. weight); 40,000 rubs Martindale Method.

- **Cal 133**
These fabrics can be used in combination with other designated SitOnIt components to meet the California Technical Bulletin 133 standard for furniture flammability.

---

**Cleaning Codes**

- **S**
  Only pure, water-free solvents may be used. Caution: Use of water-based or detergent-based solvents may cause shrinking and/or permanent water stains.

- **W-S**
  Clean with water-based cleaning agents, foam or pure water-free solvents (Environ, Carbona, Reznol or other similar products). Vacuuming or light brushing is recommended to prevent dust and soil buildup.

- **W**
  Clean with water-based cleaning agents or foam.
