## LINKING TABLES

### *High traffic. Low stress.*

Tables are like bridges joining chairs and multiseating elements. Connect like items together or mix them up. For instance, a table can link to a guest or patient chair on one side and a preconfigured, freespan, start or end element on the other. In a start/center/end configuration, a table must connect to either a start or an end. End tables have two legs and 90° radius and square tables have one leg.
