

Perfectly Designed... for Expecting Dads.

MEDICAL CITY DALLAS HOSPITAL: Labor and Delivery Rooms

Interior Design Services, Inc., Geri Hieronymus

Medical City Dallas has a reputation for providing outstanding comfort and care for expecting mothers right up until the big moment. The hospital prides itself on the peace of mind it offers during this thrilling time. So, when they needed lounge chairs for a dozen labor and delivery rooms, they were looking for comfortable lounge seating perfectly designed for a special need. But after purchasing chairs that fit their budget from a competitor, the hospital received patient complaints: the seating just wasn't comfortable. The hospital considered removing the chairs altogether. But they couldn't leave expecting dads standing!

Enter the Compositum Lounge chair. Upon seeing the price (what would come to over \$11,000 in savings), the hospital was skeptical that the chair would match their expectations for outstanding patient care. But upon receiving the demo, and performing the "Sit Test", Medical City was sold. The new seating was brought in and Medical City Dallas extended their promise of pampering not just new babies, but new parents as well.

Interior Design Services has now recommended the Compositum Lounge chair to hospitals across Texas.
